

## Who We Are

**A science-led global healthcare company committed to helping those affected by cancer do more, feel better, live longer.**

GSK scientists are focused on maximising survival through the discovery and development of novel oncology medicines that may have life-changing potential.

We have a proud history of more than 300 years helping billions of people around the world. Our goal is to be one of the world's most innovative, best performing and trusted healthcare companies.

## Our Patient Focus

We are committed to strive to **maximise patient survival through transformational medicines** to help those affected by cancer.

From research and trials to our marketed products and beyond, patients are our partners and priority. **We never lose sight of the fact that patients are at the core of what we do.**

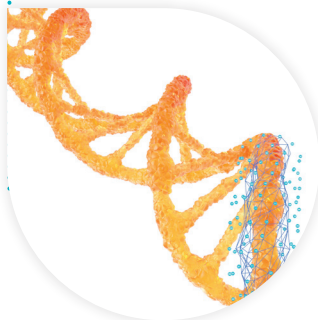

We are actively seeking input and feedback from the patient and scientific communities to **ensure the therapies we are developing are providing solutions for unmet needs.**

We are passionate in our pursuit of **innovative and effective treatments** and believe in leveraging the power of **patient-driven science** and technology.

## R&D and the Oncology Pipeline

We aim to deliver a sustainable flow of innovative treatments at the forefront of the industry utilising modalities of small molecules, antibodies, antibody drug conjugates and cells, either alone or in combination.

**We are applying GSK's unique R&D approach of Science x Technology x Culture** to the immune system, the use of human genetics, and advanced technologies.

We have a **unique R&D approach** to fight cancer on multiple groundbreaking fronts:

immuno-oncology

cell therapy

cancer epigenetics

synthetic lethality

14

We have significantly progressed our oncology pipeline and currently have 14 assets in clinical development.

Through research in therapies to address some of the most challenging cancers, including:

- ▶ multiple myeloma
- ▶ endometrial cancer
- ▶ biliary tract cancer
- ▶ ovarian cancer
- ▶ advanced non-small cell lung cancer
- ▶ head and neck squamous cell carcinoma

we are developing solutions for unmet needs to help people with cancer to not only live, but to live well.

## Our Values and Expectations

### Our Values

Transparency  
Respect  
Integrity  
Patient Focus

### Our Expectations

Courage  
Accountability  
Development  
Teamwork

Our values and expectations are at the heart of everything we do and help define our culture – so that **together we can deliver extraordinary things for our patients and consumers** and make GSK a brilliant place to work.
